

Hydraulically-operated Quick Hitch for Hitachi Loader Backhoe

Precision engineered for long life. Close tolerances achieved due to processing on a state-of-the-art vertical machining center. Wide variety of models available for different machine hook ups. Also available in a spring actuated variety.

Quick Hitch for New Holland Loader LB 115

Used as a quick coupler for the loader end of a backhoe. Locking arrangement is via a lever which can be locked and secured in a suitable position.

Established in 1972; India's oldest and largest exporter of excavator attachments; awarded "star export house" status by the government. Our buckets and quick hitches are exported to many countries in Europe, Australasia and North America.

Complete range of manufacture from buckets for mini excavators and skid steer loaders to rock buckets for tracked excavators. Quick hitches, both spring loaded and hydraulic as well as multipurpose 4 in 1 buckets are also a part of our product range.

Value for money products – extremely high quality products offered at competitive prices. Our state-of-the-art 90,000 sq ft. facility includes top-of-the-line machinery such as high definition CNC plasma cutting (Messer / Hypertherm), 4 roll CNC plate bending / rolling (Davi), NC shearing and CNC bending (Durma), digital inverter welding (Fronius), CNC turning and vertical machining centers (Okuma / Mazak) etc.

In house CAD – CAM facilities with advanced nesting and machining software for quick turn around times, customization for specific requirements, small batch sizes etc.

attachments for the
earthmoving industry*

Case 580 Backhoe Bucket

Kismet makes a variety of backhoe buckets for many machine models. Some have hardened cutting edges, liner bosses, wear strips etc. for heavy duty applications. Both weld on and bolt on type of GET are available. Typical widths vary from 12 to 36 inches.

Tilting Ditching Bucket for Hitachi Backhoe

Hydraulically operated dual cylinder bucket which tilts 45 degrees in each direction. Hardened cutting edge. Is available with a hydraulic quick hitch for more flexible operation. Also available for other backhoes. Widths can be upto 1.8 m.

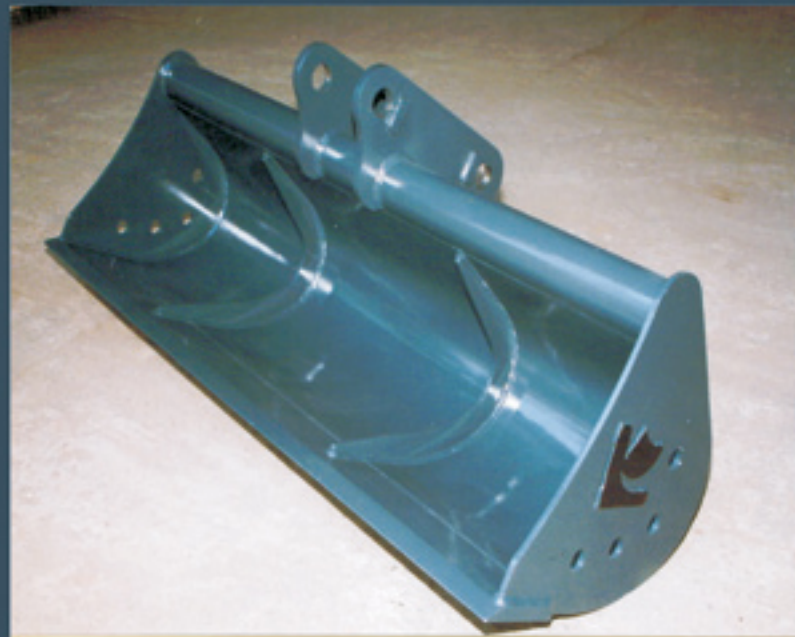

Loader Bucket for Volvo BL 61

Front loader bucket for Volvo backhoe with the provision for adding on a hardened blade which can be parked on top of the bucket when not required. Can be coupled with the quick hitch.

Trapezoidal Ditching Bucket for New Holland Backhoe

Similar buckets are made for other machine models such as Case, JCB, Komatsu etc. Sizes vary from 12 to 16 inches at the bottom to between 42 and 57 inches at the top, broader end. Both weld on and bolt on GET available.

Ditch Cleaning/Grading Bucket for Komatsu Backhoe

One of the more popular attachments made by us. Some models have drainage holes for cleaning ditches; blades can be made of high tensile or abrasion resistant steels.

Adapter Bracket for Sandvik Rammer Rock Breaker

Available for most machine models starting from small backhoes to large excavators upto 40 tons. Bottom surface is machined to close tolerances to ensure tight fitment. Made of high tensile steel.
